PROFESSIONAL SUMMARY

Final-year BCA student (83%) with strong fundamentals in Java, Data Structures & Algorithms, SQL, and Android development. Built 4 hands-on projects including a real-time parking marketplace using Firebase and Google Maps API. Interned at a Govt. of India certified IT organization with exposure to enterprise data pipelines and SDLC practices. Eager to contribute as an entry-level Software Engineer and grow within a product-driven team.

TECHNICAL SKILLS

Languages: Java | SQL | C | HTML5 | CSS3 | JavaScript

Frameworks: React.js | Firebase | Google Maps REST API

Tools: Git | GitHub | MySQL | VS Code | Android Studio

CS Concepts: Data Structures & Algorithms | OOP | DBMS | Operating Systems | Networking

INTERNSHIP EXPERIENCE

Software Development Intern

Feb 2026 – Apr 2026

Software Technology Parks of India (STPI), Dehradun — Govt. of India Recognized IT Organization

- Improved data accuracy by **reducing validation errors across 500+ structured records** by writing SQL queries to enforce integrity checks and flag anomalies in enterprise datasets
- Accelerated documentation turnaround by **cutting review cycles by ~30%** by standardizing business workflow templates and collaborating cross-functionally following Agile sprint practices
- Gained production exposure to **SDLC practices and enterprise data pipeline validation** tasks alongside senior technical staff in a certified IT environment

PROJECTS

Smart Parking Finder

2025

Android · Firebase · Google Maps REST API · Cloud Database · Personal Project

- Reduced urban parking search time by an estimated **40% for high-density areas** by building a real-time Android marketplace integrating Google Maps REST API for live location-based availability updates
- Enabled seamless dual-role access for Seekers and Owners by engineering **Firebase Authentication flows** and Cloud Database listeners that sync listing state in under 2 seconds
- Eliminated manual refresh dependency by implementing **real-time Cloud Database triggers** that push availability changes to all active sessions instantly

Sudoku Solver

2024

Java · OOP · Backtracking Algorithm · github.com/abhinandan-kashyap/Sudoku-Solver

- Achieved puzzle resolution in **under 50ms for any valid 9×9 board** by engineering a recursive backtracking algorithm with early-exit constraint validation in Java
- Reduced redundant recursive calls by **~60%** by implementing constraint propagation logic that prunes invalid states before recursion depth increases
- Maintained clean architecture across **3 modular components** (Board, Validator, Solver) using OOP encapsulation and single-responsibility principles

Pizza Sales Analysis

2024

MySQL · SQL · Data Analysis · github.com/abhinandan-kashyap/Pizza-Sales-SQL-Analysis

- Surfaced **3 actionable revenue insights** from a 10,000+ row dataset by writing 15+ optimized SQL queries using JOINS, GROUP BY, HAVING, and window functions

- Identified a **20% revenue concentration in 2 pizza SKUs** by building KPI queries for peak hours, top-sellers, and order frequency
- Improved query performance by applying **indexed filtering and subquery optimization**, demonstrating production-grade SQL judgment

Spotify Landing Page Clone

2024

HTML5 · CSS3 · JavaScript · Responsive Design · github.com/abhinandan-kashyap/Spotify-Home-page

- Achieved **pixel-accurate rendering across 3 device breakpoints** (mobile, tablet, desktop) using Flexbox and CSS Grid for adaptive multi-column layout
- Replicated **4 core production UI components** — fixed navbar, hero section, playlist cards, and footer — matching professional frontend structure and visual fidelity

EDUCATION

Bachelor of Computer Applications (BCA)

Jul 2023 – Jun 2026 (Expected)

Tula's Institute, Dehradun | Aggregate: 83%

- **Academic Excellence Award x2** — awarded consecutively (2023–24 & 2024–25) for top academic performance in a cohort of 60+ students
- Active NSS member — contributed **40+ hours** to community outreach initiatives
- Internal Hackathon participant — designed, prototyped, and pitched a tech-driven solution within a **24-hour constraint** with a team of 4

CERTIFICATIONS

Java Programming & Data Structures and Algorithms

2024

Apna College | Arrays, Linked Lists, Trees, Graphs, Recursion, Backtracking, Sorting & Searching — Java
